HAAS Stimulator

In order to help children learn about STEM from a young age, HAAS needs a realistic toy fashioned to look like one of their simulators. Parents could use it as a fun, educational way to teach their children, who would learn and grow physically and mentally.

The main features are as follows:

- Spinning Rattle
- 2 See-Saws
- E-Stop Button
- Clicky Wheel
- G-Code Centric Keyboard
- Scrolling Dinosaur

Funded by [NASA/Ohio Space Grant Consortium](#)
